Professional Summary

IT support professional who troubleshoots and resolves hardware and software problems across Windows and Linux and explains the fix clearly to both technical and non-technical users. ITIL 4 Foundation certified, with a working grasp of incident management, request fulfillment, and service level agreements. Service-oriented, with a record of handling people and sensitive information with care and following each issue through to a confirmed fix. B.S. in Network Engineering and Security. CompTIA A+, Network+, Security+, and Cloud+.

Education and Certifications

B.S. Network Engineering and Security, Western Governors University | Conferred October 2025

CompTIA A+, Network+, Security+, Cloud+ | ITIL 4 Foundation | LPI Linux Essentials

Experience

Cybersecurity Support Analyst (Intern), Log(N) Pacific (Remote) Feb 2026 - Present

- Diagnosed and resolved hardware and software issues across Windows 10/11, Windows Server, and Linux endpoints, performing root cause analysis before applying a fix and verifying each fix with a follow-up scan.
- Documented findings, remediation steps, and outcomes for both technical reviewers and non-technical readers, and wrote repeatable procedures alongside PowerShell scripts.
- Investigated inconsistent results and confirmed a recurring SQLite finding as a false positive by searching the host for the software, avoiding an unnecessary change.
- Reduced findings on a target machine from about 30 to 3 and eliminated every critical-severity finding across remediation cycles.
- Hardened Windows and Linux systems to DISA STIG baselines, including SMB signing, RDP Network Level Authentication, and secure LAN Manager defaults.
- Eliminated password-based brute-force exposure on a public-facing host by reconfiguring SSH for key-only authentication and disabling password login.

Customer-Facing Experience

Tax Preparer, Block Advisors Nov 2022 - Jul 2023

- Interviewed clients to gather financial information, explained tax details to people unfamiliar with the process, and handled sensitive personal data under deadline while preparing and filing about 70 returns in one season.

Administrative Insurance Assistant, Robert's Retirement May 2019 - Sep 2020

- Served as a point of contact for client questions, reviewed applications for accuracy, and handled sensitive personal and financial information across two insurance carriers.

Projects

- High-Availability AWS Environment (aws-ha-infra): Designed and built a two availability zone Amazon Web Services environment with Terraform, with an EventBridge and Lambda self-healing route, a Multi-AZ PostgreSQL database, Systems Manager (SSM) access without SSH keys, and CloudWatch and CloudTrail monitoring. Failure testing showed about 149-second average recovery. Work in progress.
- Linux Homelab: Operate a Proxmox lab running two Pi-hole DNS servers and a pfSense firewall, with patching automated through a Bash script and daily unattended upgrades.

Technical Skills

Support and OS: Windows 10/11 and Windows Server troubleshooting and support, Linux (Ubuntu/Debian), Active Directory, DNS/DHCP, RDP and SSH remote access

Service Management: incident management, request fulfillment, service level agreements, root cause analysis, knowledge base and technical documentation (ITIL 4)

Productivity: Microsoft Office (Word, Excel, PowerPoint)

Networking: TCP/IP, subnetting, NAT, VLANs, firewall configuration, pfSense

Automation and Tooling: PowerShell, Bash, Terraform, Ansible, Git and GitHub, Tenable, Microsoft Defender for Endpoint, Microsoft Sentinel, KQL
