PROFESSIONAL SUMMARY

IT professional with hands-on experience in Windows and Linux administration, endpoint security, and network troubleshooting. Holds CompTIA A+, Network+, Security+, and Cloud+ certifications. Security background strengthens the ability to diagnose and resolve issues efficiently while communicating clearly with both technical and non-technical colleagues.

EDUCATION & CERTIFICATIONS

B.S. Network Engineering and Security — Western Governors University | October 2025

CompTIA A+ • CompTIA Network+ • CompTIA Security+ • CompTIA Cloud+

ITIL 4 Foundations • LPI Linux Essentials

EXPERIENCE

Cybersecurity Support Analyst Intern | Log(N) Pacific | Feb 2026 – Present

- Diagnosed and resolved vulnerabilities across Windows 10/11 and Linux endpoints; reduced critical issues by 100% and high-severity issues by 90% through targeted PowerShell-based remediations.
- Executed DISA STIG compliance audits and secure configurations across Windows and Linux systems.
- Automated repetitive remediation and configuration tasks via PowerShell, reducing manual effort and human error.
- Monitored endpoint health using Microsoft Defender for Endpoint EDR; investigated brute force, data exfiltration, and ransomware indicators.
- Built Microsoft Sentinel dashboards to track logon failures and malicious traffic; wrote KQL queries to hunt threats across SIEM and EDR logs.
- Reduced brute force incidents by 91% by identifying exposure and implementing inbound NSG/firewall rules.
- Communicated findings and remediation priorities clearly to technical and non-technical stakeholders.

PROJECTS

- **Proxmox Homelab:** Self-managed virtualization environment for hands-on Linux administration, networking, and IaC practice (Terraform, Ansible).
- **AWS VPC Deployment:** Deployed isolated VPC with NAT/bastion using Terraform; managed IAM, security groups, and EC2 instances.
- **Automated Linux Configuration:** Automated secure remote access and system configuration across Linux hosts using Ansible and Tailscale.
- **Vulnerability Scanning & Remediation:** Scanned and remediated vulnerabilities on Windows 11 and Linux using Tenable; documented findings and tracked closure.

TECHNICAL SKILLS

Support & OS: Windows 10/11 troubleshooting & support, Linux (Ubuntu/Debian), Active Directory, DNS/DHCP, RDP/SSH remote access

Networking: TCP/IP, subnetting, NAT, routing, VLANs, firewall configuration, pfSense, Tailscale VPN

Virtualization & Cloud: VMware Workstation, Hyper-V, Proxmox, AWS (EC2, VPC, IAM, Security Groups)

Automation & Security: PowerShell, Bash, Terraform, Ansible, Git, Tenable, Microsoft Defender for Endpoint, Microsoft Sentinel, KQL, DISA STIG
