URIAH RAFFER

Elk Grove, CA | 916-213-9145 | umraffer32@gmail.com | linkedin.com/in/umraffer32 | github.com/umraffer32

Professional Summary

Hands-on IT support troubleshooter who diagnoses network, Wi-Fi, and configuration issues to root cause, with additional experience hardening and monitoring systems against security baselines. Brings client-facing customer service experience from tax preparation.

Education and Certifications

B.S. Network Engineering and Security, Western Governors University | 2023 - 2025 (coursework in IoT, wireless networking, and network automation)

CompTIA A+, Network+, Security+, Cloud+ | ITIL 4 Foundation | LPI Linux Essentials

Experience

Cybersecurity Analyst (Intern), Log(N) Pacific (Remote) Feb 2026 - Present

- Hardened Windows and Linux configurations by applying DISA STIG baselines, correcting 10 failing controls, documenting each fix, and re-scanning to confirm it held.
- Ran authenticated Tenable scans, then used PowerShell to correct weak configuration settings and end-of-life software, cutting findings 90% (30 down to 3).
- Spotted a brute-force pattern of roughly 100 failed logins, then used KQL against Sentinel and Defender for Endpoint telemetry to trace and document it.

Projects and Lab Experience

- **Home Wi-Fi Coverage Troubleshooting:** Diagnosed a dead-zone problem caused by router placement under furniture, relocated the router to a central, unobstructed spot, and switched from 5 GHz to 2.4 GHz on a non-overlapping channel to maximize range for a 50 Mbps plan.
- **Home Network Wired Backhaul:** Diagnosed a two-unit Eero mesh's unreliable wireless backhaul dropping connections upstairs, then ran a 150-foot Cat 6 line to wire the upstairs unit and installed a switch, giving upstairs devices a stable connection.
- **IT Service Desk Ticketing Lab (GLPI ITSM):** Built a self-hosted GLPI incident-management server with SLA-based ticket escalation, category-based auto-routing, an asset inventory, and a knowledge base.
- **IT Support Troubleshooting (WGU Hands-On Labs):** Resolved simulated Tier 2/3 network and end-user trouble tickets, fixing DNS, DHCP scope exhaustion, switch routing faults, and static IP misconfigurations.
- **CalCareers Job Search Automation (Python):** Built a version-controlled Python scraper (GitHub) using requests, BeautifulSoup, and headless Chromium that reverse-engineered an undocumented ASP.NET WebForms flow to automatically track new state IT postings.

Customer Service Experience

Tax Preparer, Block Advisors Nov 2022 - Jul 2023

- Filed roughly 70 individual tax returns during my first season with the firm, generating about $24,000 in revenue using BlockWorks.
- Walked clients through their filing status and requirements in plain language, adjusting each explanation to how much tax experience they had.

Technical Skills

Network and Service Desk Support: Network and Connectivity Troubleshooting, Router and Switch Configuration, Wi-Fi Coverage and Channel Tuning, DNS, DHCP, Linux, ITSM Ticketing and SLA Management (GLPI)

Systems Monitoring and Hardening: SIEM (Microsoft Sentinel), EDR (Microsoft Defender for Endpoint), KQL, Vulnerability Management (Tenable), Secure-Configuration Hardening (DISA STIG)

Scripting and Version Control: Python, PowerShell, Git and GitHub
