**General Statement**

This position requires the incumbent to maintain consistent and regular attendance; communicate effectively (orally and in writing if both appropriate) in dealing with the public and/or other employees; develop and maintain knowledge and skill related to specific tasks, methodologies, materials, tools and equipment; complete assignments in a timely and efficient manner; and adhere to department policies and procedures regarding attendance, leave, and conduct.

**Equity Statement**

The Department of Toxic Substances Control (DTSC) values diversity, equity, and inclusion throughout the organization. We foster an environment where employees from a variety of backgrounds, cultures, and personal experiences are welcomed and can thrive. We believe the diversity of our employees is essential to inspiring innovative solutions. Together we further our mission to protect California's people and environment from harmful effects of toxic substances by restoring contaminated resources, enforcing hazardous waste laws, reducing hazardous waste generation, and encouraging the manufacture of chemically safer products.

**Position Description**

Under direction of the Information Technology Manager I (IT MGR I) of the Infrastructure Support Branch, the Information Technology Specialist I (IT Spec I) is responsible for the design, planning, configuration, operation and maintenance, administration, security, and documentation of IT server infrastructure. IT Spec I is the lead analyst responsible for DTSC Server environments and network infrastructure including Windows and CISCO servers, routers, and switches. The incumbent works closely with the infrastructure team on diverse technical projects to complete upgrades, implementations, migrations to new technology or to resolve technical issues. Responsibilities include support for DTSC Headquarters, Regional, and Satellite Office locations. Specific duties include, but are not limited to:

| Essential Functions (Including percentage of time): | |
|---|---|
| **40%** | **Lead Server and Virtualization Administrator**<br>Server Administration: Serves as a technical administrator over DTSC's Microsoft Windows server environment. Supports Microsoft products including Windows Server, Domain Name System (DNS), Dynamic Host Configuration Protocol (DHCP), and Active Directory and logon scripts. Oversee the administration and optimization of server and storage performance, ensuring compliance and security via regularly scheduled patching and maintenance, conducts capacity planning activities, and proactively keeps management apprised of status and issues. Coordinates the testing and validation of production applications and infrastructure software following routine patching and maintenance. Manages backup and recovery infrastructure, performs data recovery as needed, and supports Technical Recovery Plan testing.<br>Virtualization Administrator: Serves as a technical administrator on IT projects involving complex virtualization design, configuration, and implementation. Assists in the maintenance and administration of all aspects of VMware virtualization including blade server hardware, software, and system management. Provides support and troubleshooting of virtual systems and storage arrays as well as host servers/services and integrated components of the network. The incumbent coordinates the testing of complex server requirements; reviews and evaluates server test results; discusses and makes recommendations on final proposed solution; makes customer requested changes in a testing environment to ensure all necessary changes are properly done prior to deployment; monitors implemented solution to ensure solution is functioning as expected; and reviews user instructions and support documentation. The incumbent provides support for all Virtual Desktop Infrastructure (VDI) related technologies such as: Microsoft Active Directory (AD), VMware Horizon View, VMware ESXi, Cisco UCS, and Storage Area Network arrays. IT SPEC I will serve as a subject matter expert that works directly with customers to resolve VDI-related issues, as well as assist Service Desk staff in resolving virtual desktop problems.<br>Infrastructure and Cloud Support: The IT SPEC I will be responsible for communication devices support, Entra ID, Domain Name System (DNS), Dynamic Host Configuration Protocol (DHCP), and UPS monitoring and support. Will take directions from the DTSC cloud architect and provide cloud infrastructure support (primarily Azure) as the department adopts cloud technologies. |
| **30%** | **Backup and Supporting Roles**<br>Works closely and productively with the Enterprise Architect and other IT analysts to support DTSC technical architecture. Keeps management informed of status and issues. Monitors the DTSC environment for network or telecommunications security issues and provides technical support to the DTSC Information Security Officer (ISO) with identification, remediation and prevention of intrusion, malware, or phishing attacks. Assists the ISO in the identification of inappropriate or threatening software and allowable software found on the DTSC network (Block List/Allow List). Troubleshoot technical issues that negatively impact the performance of business applications and network operating systems. Provides technical guidance to other technical analysts and Service Desk staff; gives consultation to other program areas regarding technical problems, solutions, or upgrades; and effectively coordinates changes to minimize adverse effects on business clients. Works more complex IT Service Management (ITSM) tickets that have been escalated by Tier 1 Service Desk staff in accordance with Service Level Agreements and the ITIL-based Standard Operating Procedures. Supports technical environments shared with other BDOs. Participate in and comply with an IT Change Management process. |
| **20%** | **Planning and Analysis**<br>Develops, executes, and recommends plans for management approval regarding the implementation of changes that will improve the performance of the DTSC infrastructure, operating systems, and application software in the enterprise IT environment. Works with vendors to define solutions, determine cost estimates, and plan implementation to complete upgrades or resolve technical issues including efforts to improve performance, save costs, or modernize the DTSC infrastructure. Assists CalEPA or other BDOs with technical information, solutions, or recommendations with management direction. Cooperates with BDOs to take advantage of cross solutions, sharing technology or expertise with other BDOs and CalEPA. Works with technical staff from CalEPA or other BDOs and participates in technical teams and |

| | |
|---|---|
| | meetings. Informs management of infrastructure changes and issues and advises management on potential technical improvements to the network or server environment to improve performance, save money, or enhance IT services for DTSC programs. |
| **Marginal Functions (Including percentage of time):** | |
| **5%** | **Administrative Duties**<br>Performs administrative duties including, but not limited to: adhering to Department policies, rules and procedures; submits administrative requests including leave, overtime, travel, and training in a timely and appropriate manner; accurately reports time in the Daily Log system; and submits time sheets by the due date. |
| **5%** | **Other Related Duties**<br>Performs other related duties as assigned including but not limited to: developing and reviews data sharing agreements prior to the release of confidential information; investigates and reports security incidents; and analyzes business impact and exposure—based on emerging security threats, vulnerabilities, and risks—to recommend IT solutions. |
| **Consequences of Error: (if applicable)** | |
| **Typical Physical Conditions/Demands:** | |
| Sitting, keyboarding, and use of mouse. Ability to lift and move heavy objects, such as technology hardware and peripherals. | |
| **Typical Working Conditions:** | |
| The incumbent works in a cubicle environment within a high-rise office building in downtown Sacramento. Approximately 95% of the work is done using a desktop computer. A small amount of time is spent working within an environmentally controlled data center. The incumbent must be able to work well alone or on technical teams. This might involve being team leader or a team member. The incumbent must be responsive to changing priorities and able to work irregular hours to accomplish technical tasks or resolve urgent technical problems. | |
| **Special Requirements of Position (Check all that apply):** | |
| ☐ Duties performed may require pre-employment and/ or routine screenings (background/criminal/fingerprint clearance, drug testing, fingerprinting, physical, etc.).<br>☐ Duties require participation in the DMV Pull Notice Program.<br>☐ Performs other duties requiring high physical demand. (Explain below)<br>☐ Requires repetitive movement of heavy objects and/or operation of heavy machinery or motorized vehicles.<br>☒ Other (Explain below) | |
| **Explanation:** | |

Personal Contacts: The incumbent has daily contact with all levels of DTSC staff and management and must communicate the most complex technical and business process risks and issues to Executive staff. These contacts will frequently involve confidential and sensitive information regarding personnel, enforcement, and legal activities. The incumbent will have regular contact with vendors and contractors, as well as occasional contact with other State departments, local government organizations, and external stakeholders.

Actions and Consequences: There are four areas in which there could be consequences to OEIM and/or the Department if the job is performed inadequately, including: Failure to properly direct, detect, report, and mitigate security breaches and intrusions could result in the release of sensitive and/or confidential information to users or the public who do not have authorization to receive this type of information. This error could compromise enforcement actions or disrupt the deliberate decision making or legal process for sensitive projects. The consequences will extend beyond the work performed to affect other programs in the Department. The magnitude of this type of error is critical and could result in litigation against the Department. Given the confidential nature of DTSC's regulatory activities, the unauthorized release of sensitive information could also compromise national security. Failure to ensure DTSC's compliance with control agency information security procedures and reporting requirements could jeopardize DTSC's credibility with the State Office of Information Security. The magnitude of this type of error is moderate and could tarnish the Department's reputation with control agencies and the Governor's Office. Failure to properly report and/or monitor inappropriate employee behavior and misuse of systems and resources could result in embarrassment to OEIM and loss of credibility with customers. The magnitude of this type of error is moderate and could result in loss of productivity, increase security vulnerabilities, and could contribute to an inappropriate work environment. Failure to perform the duties described above, or failure to perform these duties correctly or in a timely manner, could result in the inability of DTSC to meet regulatory commitments and to perform daily business activities. The potential impact ranges from minor inconveniences to DTSC staff to security impairments and mission critical activities. In addition, such failure could impact on the Department's ability to ensure security, public safety and have negative financial impacts on DTSC.

Other Information: This position requires the ability to reason logically and creatively, develop and evaluate alternatives, analyze data, effectively communicate ideas and information, and effectively gain and maintain the confidence and cooperation of those contacted during work. The incumbent must exhibit punctuality and dependability in executing the duties of this position. The incumbent must possess knowledge and skill in the SDLC as it applies to IT, business process re-engineering, as well as administering and supporting an enterprise IT telecommunications environment. The incumbent must have good customer service skills and work well with others in a team environment.

**Supervisor Statement**

I certify this duty statement represents an accurate description of the essential functions of this position. I have discussed the duties of this position with the employee and provided the employee a copy of this duty statement.
