URIAH RAFFER

Elk Grove, CA | 916-213-9145 | umraffer32@gmail.com | linkedin.com/in/umraffer32 | github.com/umraffer32

PROFESSIONAL SUMMARY

Information technology support professional with hands-on experience providing first and second-level desktop and field support and resolving computer hardware, software, and peripheral problems for end users by phone, in person, and through remote tools. Comfortable setting up and deploying workstations and devices, installing and configuring operating systems and software, supporting Windows and Microsoft 365, administering Active Directory accounts, and recovering data and maintaining backups. Strong at logging and documenting issues, escalating incidents to the right group, root cause analysis, and timely customer service aligned to SLAs, with a security foundation from a cybersecurity internship.

EDUCATION AND CERTIFICATIONS

B.S. Network Engineering and Security, Western Governors University | Conferred October 2025

CompTIA A+, Network+, Security+, Cloud+ | ITIL 4 Foundation | LPI Linux Essentials

EXPERIENCE

Cybersecurity Analyst (Intern), Log(N) Pacific (Remote) Feb 2026 - Present

- Diagnosed and resolved system and endpoint issues to root cause across Windows and Linux, documenting each fix in clear, plain-language write-ups for technical and non-technical readers.
- Provided technical assistance for computer hardware, software, and configuration issues across supported systems.
- Monitored endpoint and system health with endpoint detection and response (Microsoft Defender for Endpoint), triaged alerts such as failed logon attempts, and escalated only after confirming the underlying cause.
- Performed authenticated vulnerability scans on endpoints and servers, prioritized issues by risk and impact, remediated misconfigurations and outdated software with PowerShell, and hardened systems to secure-configuration baselines.

TECHNICAL SUPPORT AND LAB EXPERIENCE

IT Support Troubleshooting, WGU Hands-On Lab Assessment 2024 - 2025

- Resolved a set of simulated end-user trouble tickets from start to finish, performing root cause analysis and verifying each fix across DNS, DHCP, routing, account lockouts, and client workstation and static IP misconfigurations.

PROJECTS

- **Windows and Linux Homelab:** Run a Proxmox VE virtualization host with Windows Server providing Active Directory, DNS, and DHCP, where I set up the server hardware and storage, install operating systems, create and troubleshoot virtual machines, and handle user accounts, password resets, and organizational units, alongside Linux services behind a pfSense firewall, with snapshots and a patching script for recovery.
- **Vulnerability Scanning and Remediation:** Ran authenticated Tenable scans on a Windows Server, remediated findings with PowerShell, and stood up scheduled scans and patch management, reducing identified vulnerabilities by roughly 90% across scan cycles.

ADDITIONAL EXPERIENCE

Tax Preparer, Block Advisors (2022 to 2023). Served clients directly in a fast-paced seasonal office, explained complex information to non-technical people clearly, and handled sensitive data with care and discretion.

TECHNICAL SKILLS

Service Desk and Support: first and second-level desktop and field support, incident logging, documentation, and escalation, Windows 10 and 11 and Microsoft 365 support, hardware, software, and peripheral troubleshooting, workstation and device deployment, printer and scanner support, operating system installation, data recovery and backups, mobile device support, remote support tools (Tailscale, RustDesk), knowledge base and training documentation, ticketing and SLA concepts, customer service

Virtualization and Systems: Proxmox VE, VMware Workstation, Hyper-V, VirtualBox, virtual machine creation and troubleshooting, server and storage setup, computer and peripheral repair, Windows Server, Active Directory user provisioning, password resets, and security group management, Linux (Ubuntu and Debian)

Networking: DNS, DHCP, TCP/IP, routing, VLANs, VPN, Wi-Fi troubleshooting, pfSense firewalls

Security and Automation: vulnerability management (Tenable), endpoint detection and response (Microsoft Defender), secure-configuration hardening, PowerShell, Bash, Git and GitHub
